

# Grapheme War

## What you need:

Grapheme War Word Cards

Timer

## How to play:

Cut out the word-element cards.

Shuffle the cards and divide them evenly among players.

Each player places their cards in a stack face down in front of them.

If using a timer, set it to the desired amount of time.

Each player simultaneously turns up the top card of their stack.

One at a time, each player takes a turn to Tap-Spell (Spell-Out-Loud) the word element.

Count the number of graphemes written on the card.

If the cards are the same rank, it is a war!

Each player places the next card from their pile face down, then another card face up.

The player with the higher card wins both (or all) cards and places them at the bottom of their stack.

Continue play until players run out of cards or the time ends.

The player with the most amount of cards wins Grapheme War.
